

# Get an Edge with GIMS General Insurance Management System

GIMS is a fully integrated modular enterprise solution with rich functionality. GIMS is set up and maintained by your business analysts through an extensive table driven support centre. It supports your in-house implementation or can be supported through Tritech's data centre ("SAS" software service). GIMS supports all lines of business in all provinces/states and runs on modern hardware and software configurations with connectivity to leading Business Intelligence tools and Third Party Interfaces.

GIMS is available as an in-house installation and through our outsourcing world class data centre. Tritech fully engages itself in every implementation with our experienced teams, thereby ensuring GIMS goes live on-time and within budget. Tritech has been an Insurance Software Vendor for 20+ years. Our clients are large and small insurance companies, Farm Mutuals and Underwriting Managers. GIMS has been successfully installed in over 20 P&C insurers in Canada, USA and the Caribbean.

#### **Tritech clients have:**

- ◆ Slashed IT spending by up to 50%
- ◆ Significantly reduced the time it takes to implement business goals
- ◆ Strengthened Management and Operational Efficiencies
